

VERTICAL SEALANT TESTER

We have carved a niche amongst the most trusted names in this business, engaged in offering a comprehensive range of Sealant Testing Machine. This Series Dual Column Tabletop Testing Systems are ideal for tension and/or compression applications where tests are less than 50 kN.

The various Series Dual Column testing systems provide simplicity, performance, and affordability for quality control (QC) labs and production testing. Models are available in load force capacities of 10, 50, 100kN

The test performed on this machine is an accelerated laboratory procedure for evaluating the performance of a building sealant in a test configuration that is subjected to water immersion, cyclic movement, and temperature change.

Product Specifications:

Display	Digital Display with test data output through inbuilt software
Power	220 V, Single phase, 50 Hz
Specimen Capacity	6 (standard) Up to 8 Nos.
Accuracy	± 0.5 %
Standard Speed	0.05 mm/min 3.2mm/hr 1/8 inch per hour *Optional through Servo Controlled & software
Grip to Grip Suspension	Min 1 mm and Max.300 mm (Applicable only with standard grip)
Display	LCD, HMI
Units	°C mm
Drive Mechanism	Variable Frequency Drive
Safety	Yes
Approx. Weight	400 Kg
Finish	Power coated / Zinc plating for corrosion resistant finish
Displacement Calibration	Inhouse Calibration + NABL Certificate (on demand)

The model CIE-VST-10kN meets ASTM C719, C910, C920, C736, when paired with the Eqvimech's wide specimen fixture. Cyclic Displacement, speed, are fully adjustable, and numeric displays provide continuous feedback on all test parameters.

Features:

- Speed Control through Variable Frequency drive automation by Touch Controls.
- Highly sensitive load sensor with linearity feature and repeatability
- Cross head travel length: 300 mm without grips
- Twin column rugged structure
- Safety limit switches for over travel safety
- Hardened Ground ball screws for frictionless movement
- Advanced Navigation System
- Easy Data Management.
- Secured working with key protection feature
- Test Control Wizard to set test parameters like tension, compression
- Changeable units in cm/mm/inch.
- Automatic end test/return to home position through software interface after completion of test.
- Immediate analysis of results after test with complete Accuracy & precision.
